

KENT HYDRA RAMS 5GII & 8GII

Hydra Ram Models 5G and 8G are among the most productive hammers in their class, with impressive power to weight ratios and all the maneuverability of the smaller Hydra-Rams. Specially designed for use on rubber tired backhoes and skid steer loaders, both models provide maximum impact power with excellent reliability in all working conditions. Like all hammers in the Kent Hydra Ram family, these models have a blow frequency adjuster that adapts the tool and carrier to any working condition.

Features/Benefits

- Nitrogen charged back head for superior impact energy.
- Square breaker body encased by heavy-duty sideplates provide unmatched strength and reliability.
- Specially-designed piston for efficient transfer of energy to working steel.
- New valve design suppresses hydraulic pulsation which can be harmful to the carrier.
- Standard working steel of your choice with mounting pins at no additional charge.
- Centrally located major parts for ease of access and maintenance.
- Replaceable front head bushing.
- Custom bracketing available for most skid steer models.
