

KENT HYDRA RAM 30GII

One of the most popular models in the Kent Hydra Ram family, the 30G's excellent impact energy and excellent reliability make it a premier performer in tough working conditions. Designed for use on excavators or wheel loaders, and built to deliver 5,000 foot pounds of impact force, the 30G is ideally suited for heavy quarry work, hard rock mining, bridge work and other major demolition tasks. Like all Kent Hydra Rams, the 30G is built for lasting performance with features like one-piece, heavy-duty sideplates for unmatched strength and rigidity. An innovative valve design also suppresses hydraulic pulsation for operator comfort and carrier protection.

Features/Benefits

- Specially-designed piston for efficient transfer of energy to working steel.
- Frequency blow adjuster adapts tool and carrier to work conditions.
- Square breaker body encased by heavy-duty sideplates for outstanding strength and rigidity.
- Standard working steel of your choice with mounting pins at no additional charge.
- Replaceable front head bushings, plus centralized arrangement of major parts aside cylinder head for easy access and maintenance.
- Underwater installation kits available.
